ROLE MANUAL

Co-Founder

What it costs, and what leaves

You are the quality gate and the budget gate.
Nothing reaches a client that you have not seen, and no money leaves without you.

Following FZC

Internal, not for clients

6 November 2026

How a day *goes*

Three moments. Everything else finds you.

First thing

- Open **Rates**. Clients have said yes; these campaigns cannot open until you price them.
- Open **Decisions**. Everything held for you, oldest first.

Through the day

- Clear rosters quickly. Talent cannot move until you do.
- Strike with a reason. The reason stops the repeat next month.
- Check the talent board on **Rates**: who is holding what, and what is late.

Before you log off

- Nothing has waited on you for more than a day.

Where your work *sits*

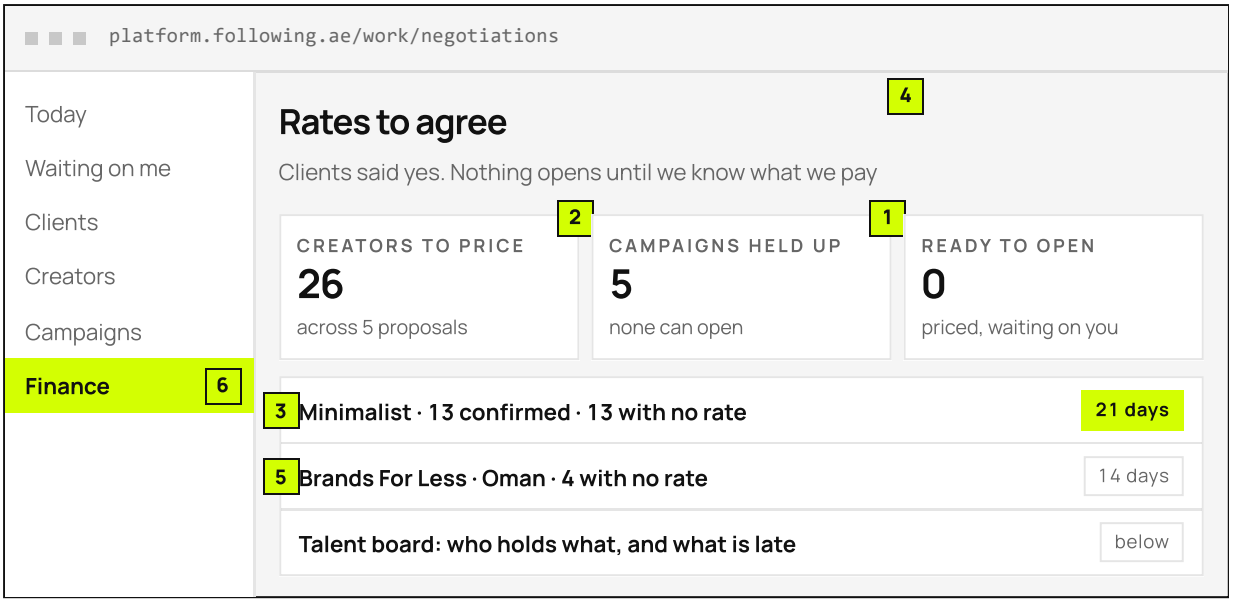

Nothing opens until you have priced it, and nothing leaves until you have cleared it. You are also the second pair of hands when the founder is away.

BUSINESS DEV **Find the brand**	BUSINESS DEV **Agree the deal**	TALENT **Find creators**	FOUNDERS **Agree what we pay**
TALENT **Book and paper them**	ACCOUNT MGMT **Content and approvals**	ACCOUNT MGMT **Results to the client**	FOUNDERS **Invoice and pay**

Your part

The screen you will live *in*

Drawn, not photographed, so it stays true when a button moves.
The numbers are explained underneath.

1 Longest wait first. The top row is the campaign that has been stuck longest.

2 Every one of these is a client who has already said yes and cannot start.

3 Open one and put the real negotiated cost against each creator.

4 The margin moves as you type, before you commit anything.

5 When every creator has a rate, the campaign can be opened.

6 The talent board underneath: counts, never scores. Where the load is, not who is better.

Where things *live*

The menu down the left of the screen. This is all of it.

Today	What your day is made of
Decisions	Everything waiting on a decision from you
Requests	What clients and colleagues have asked for
Guide	What every screen is for
WORK	
Pipeline	Every creator we owe something, and what happens next
Clients	The brands we run
Creators	The master database, with cost and sell pricing
ScoutOutreach	Your outreach teammate: its goals, its live work and everyone it has found
Campaigns	Live work and where each creator has got to
Affiliate links	Every campaign's short links, clicks and sales in one place
Finance	In, out, and committed but unpaid

What you actually *do*

In order. The strip on each card is what to click, as you click it.

1 Clear a roster

When talent sends creators for review. Today says "Price N shortlisted creators".

GO TO **Creators** › **Rosters** › **Open the brand's roster**

1. Check each against the brief's budget, real market, engagement and recent use.
2. Rows **Waiting for a founder to price** carry **Price**. The margin shows as you type.
3. They become sellable and cleared in one step. Nobody else sets sell.
4. The ones that miss: tick them, **Send back** with a note ("find options at 3.5k").

✓ **Next:** Priced creators go back onto the roster as **Ready**. Talent adds them to a proposal.

2 Keep ScoutOutreach pointed at the brief

Whenever a roster needs more creators than talent can reach by hand.

GO TO **ScoutOutreach**

1. Open the campaign and set **Who fits**: location, follower range, language.
2. It searches when the DM queue is under 60: every 3 hours at most, 12 in total.
3. Say yes or no on what it finds. The screening follows your decisions.
4. If the bot needs a person, somebody signs in on the bot PC and presses **Resume**.

✓ **Next:** Rates land on the roster. Talent sends them to you for review.

3 Keep enrolments moving

After a client confirms. Only the superadmin creates the links.

GO TO **Campaigns** › **Enrolments**

1. Every enrolment, and who is stuck where. Each links to its brand, campaign and proposal.
2. A passport the system could not match comes to a person: **Looks right** or **Send back**.
3. A payee that did not confirm itself shows why. A person confirms it.

✓ **Next:** Signed creators flow into Payables and Payout runs.

4 Release what the client sees

When posts are measured, or a campaign's links have numbers.

GO TO **Campaigns** › **Open a campaign** › **Performance**

1. Each pasted post waits for you. Release it and it reaches their Results.
2. On the **Links** tab, **Show the brand** releases clicks and sales (superadmin).
3. Nothing a client sees goes out by itself.

5 Release money

When work is delivered and a payment is requested.

GO TO **Finance** › Approvals

1. Check the work actually landed before approving.
2. Check the creator has signed and given their own bank details.
3. Approve. Nothing pays out that the client has not funded.

✓ **Next:** The payment joins the next payout run.

6 Watch the shape of the week

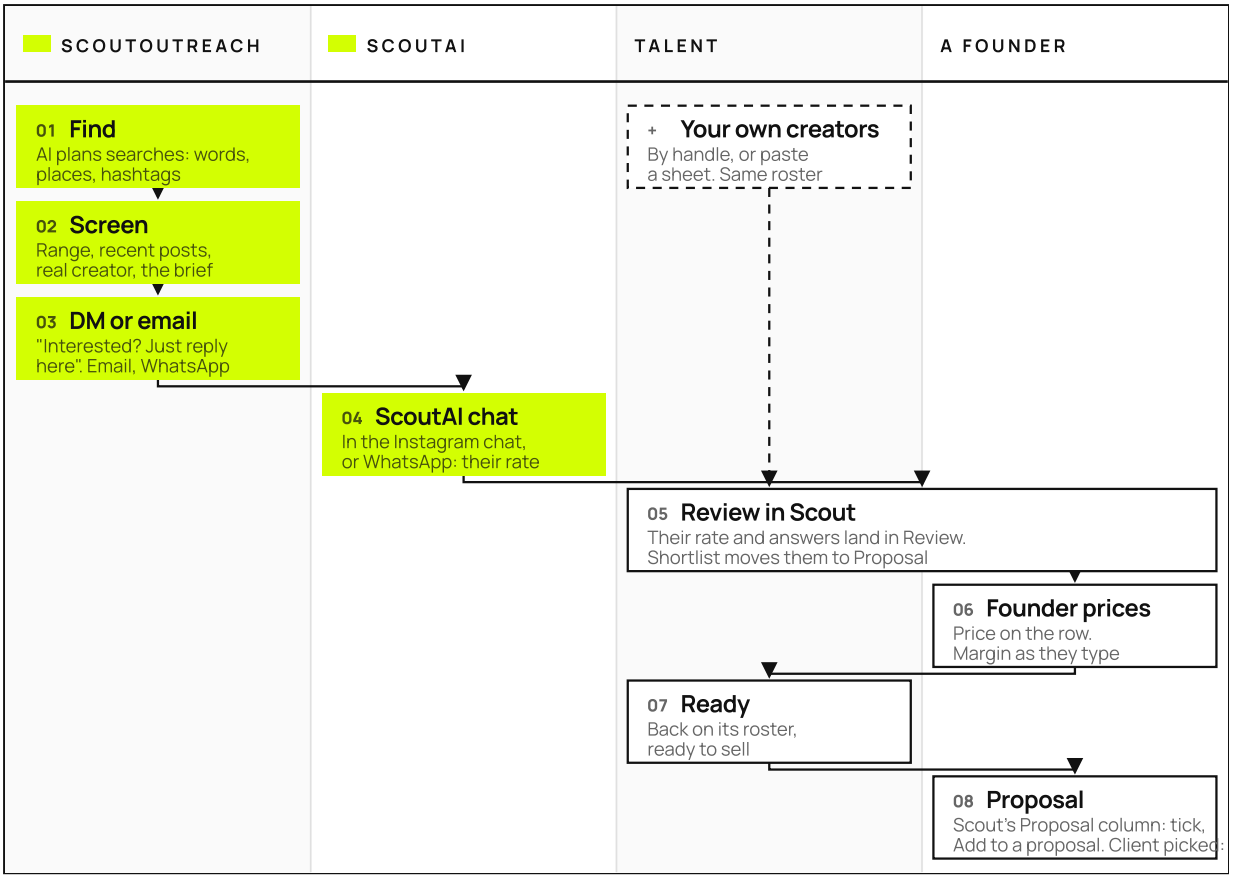

Once a week is enough.

GO TO **Admin** › Company › Targets

1. Targets and progress for the whole team.
2. Quiet brands and overdue rosters reach you without looking.

ScoutOutreach and *ScoutAI*

ScoutOutreach finds creators who fit a brief and reaches them. ScoutAI talks to the ones who answer and puts their rate on the roster. Talent keeps sourcing beside them.

When Instagram slows it down, it rests by itself

20 minutes › 1 hour › 3 hours › 10am tomorrow › **Carries on**

The one time it needs a person. If Instagram logs the account out or asks for a check, the bot stops and says so on ScoutOutreach. Somebody signs in to Instagram on that office PC, then presses **Resume**.

How *each one* works

ScoutOutreach finds them

- One roster, one brief: location, follower range, language.
- Everything happens at **ScoutOutreach**: a live bar, then a brand tile per campaign and its board left to right: Brief and fit, Reach, Review, Proposal. The roster keeps a ScoutOutreach tab with the funnel and an Open button; nothing is decided there.
- Found creators wait in Reach for a yes or a skip before any DM. A founder can set a campaign to automatic. A barter campaign with no ceiling runs on a 100K default; no ceiling at all shows in red.
- When ScoutAI is unsure how to answer, the draft waits in Reach beside the creator's message: send, edit, or drop it and write yourself.
- Screens on follower range, a post in 60 days, a real creator, not based elsewhere. Then an AI reads each against the brief and the team's own yes and no, with a written reason.
- A hashtag search reads the 40 most recent posts from up to 4 hashtags. Light analytics on each creator costs about $0.008.
- The DM bot sends from the company's Instagram, in Chrome on an office PC. No link: "Interested? Just reply here". ScoutAI holds the chat.
- Creators who list an email get one automatically from hello@following.ae, with a WhatsApp button.
- WhatsApp alerts go to creators in our network on Meta-approved templates. Paid is never called barter.

ScoutAI talks to them

- A creator who replies to the DM talks to ScoutAI in that same Instagram chat, in English.
- On WhatsApp, a campaign can run an open call with a code, like **OC-D7F4E**.
- It explains the brief and asks the screening questions set for the campaign.
- For paid work it asks their rate, and can counter within that campaign's negotiation rules.
- Creators answer with tap buttons or in their own words.
- It adds them to the roster with their rate. A decline or a poor fit is recorded with the reason.
- Its WhatsApp chats are kept on the Desk and never ring the team's bell.

Its pace, so the account stays safe

10 min It checks every campaign, but never searches while every DM account rests	**Under 60** In a campaign's DM queue before it searches for more	**3 hours** At least, between two searches on one campaign	**6 a day** Searches at most, across all campaigns
12 Searches per campaign in total, then it stops and says so	**40 a day** DMs to start, rising by 15 a day to the cap	**60 to 120 s** Between one DM and the next. Campaigns take turns	**14 days** Before anybody is DMed again

What *the roster* tells you

Every row says its next step and carries one button for it, plus **Skip** and a **…** menu. Skip means not for this campaign; the creator stays in the database.

THE ROW SAYS	BUTTON	WHO MOVES IT
Needs a rate	Add rate	Talent
ScoutOutreach asked for their rate	Nothing to press	It lands by itself
ScoutAI is getting their rate	Nothing to press	It lands by itself
Rate in, send for review	Send for review	Talent
Waiting for a founder to price	Price	A founder
Ready	Add to proposal	Talent
On the proposal's name	Open	The client
Client picked	Book	Talent

SOURCE TABS **ScoutOutreach** found by ScoutOutreach · **ScoutAI (WhatsApp)** arrived in a chat · **Your sheet** pasted in by the team · **Database** from the master database

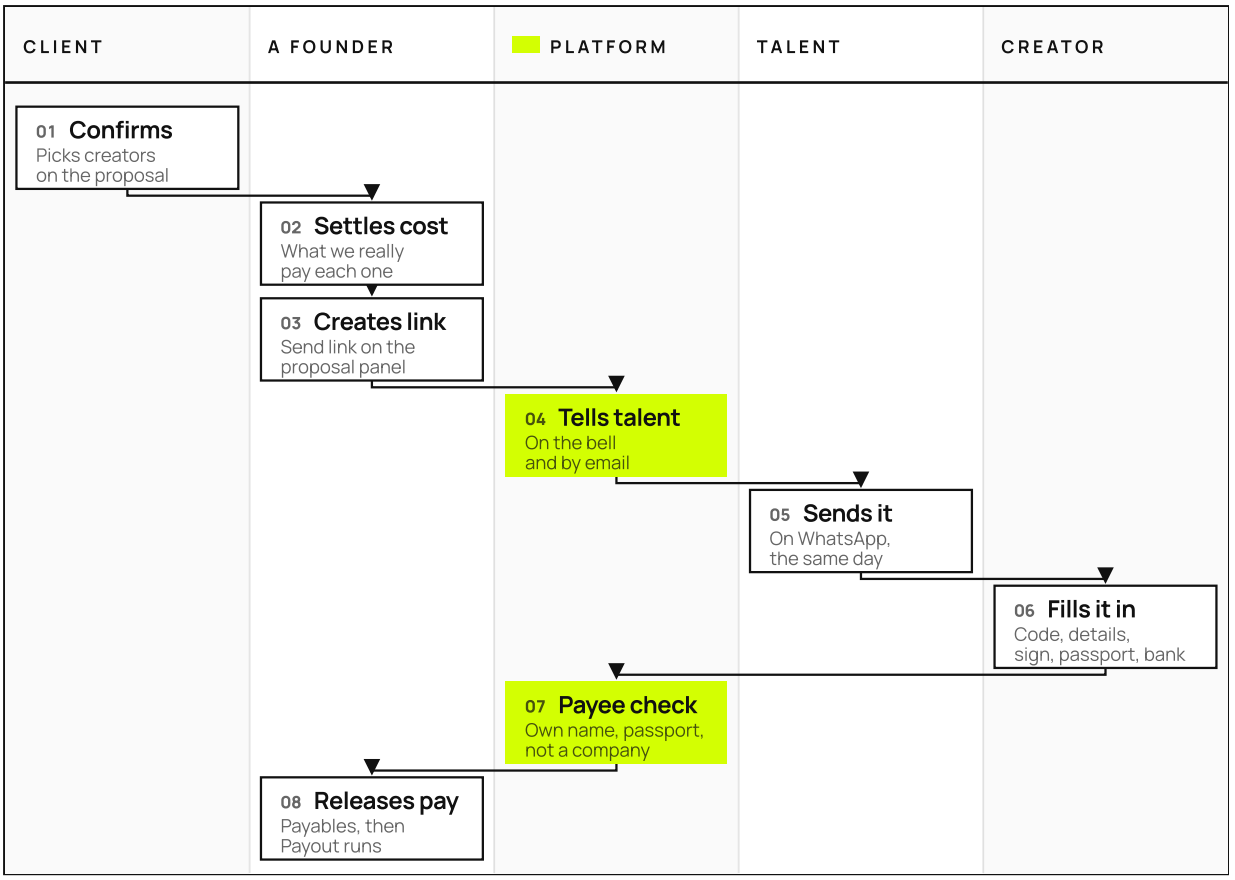

✓ Your part

GO TO ScoutOutreach

1. Set **Who fits** on each campaign: location, follower range, language.
2. Say yes or no on what it finds. The screening learns from it.
3. Price what talent sends for review. It goes back to the roster as **Ready**.
4. Bot stopped and needs a person: somebody signs in on the bot PC, then **Resume**.

Enrolments, start to *finish*

The paperwork that lets us pay a booked creator: agreement, details, address, passport and bank. Only the superadmin sets one up. Talent sends it and sees it through.

The platform does this A person does this

Campaigns, then Enrolments	Every enrolment. Each record links to its brand, campaign and proposal.
The proposal panel	**Send link** for each creator, and **See its enrolments** for just that proposal.
Finance: Payables, Payout runs	Where the money goes next. Only founders release it.

⃠ A link is personal. Never post one in a group, a story or anywhere public.

What *the creator* does

1	**Email**	Verifies their email with a code.
2	**Details**	Name, contact and address. New links ask **Home** or **Office**. A home is a villa or an apartment: number, floor, building or community. An office has the company name.
3	**Agreement**	Reads and signs it.
4	**Passport**	Uploads it. The system reads the name and the expiry.
5	**Bank**	Gives an IBAN, or for an exchange-house payout, the city they collect in.

The payee confirms itself when

- The bank account is in the creator's own signed name. A shortened surname still counts.
- A passport is uploaded.
- It is not a company account.
- Anything else comes to a person, with the reason shown.

Passports

- The system checks the name and the expiry date.
- A mismatch comes to a person, on the enrolment record.
- **Looks right** accepts it. **Send back** reopens the creator's passport step.
- After a send back, talent tells the creator. They will not know otherwise.

✓ Your part

GO TO **Campaigns** › **Enrolments**

1. You do not create links; the superadmin does. You keep them moving.
2. Check passports that did not match: **Looks right** or **Send back**.
3. Confirm a payee that did not confirm itself, reading the reason first.
4. Release payments in Payables and Payout runs.

Thirteen creators, one *afternoon*

One job, followed the whole way, with the real numbers.

Start to finish

OPEN	Minimalist confirmed three weeks ago. Thirteen creators, not one priced, and the campaign cannot open.
WHY	Nobody was chasing it because it lived inside one proposal's page. That is what this screen exists to stop.
PRICE	What we quoted is what we assumed. What we pay is what you negotiate. On the live Lago campaign one creator quoted 6,000 settled at 3,500.
WATCH	The margin updates as you type. You see the consequence of a number before you commit it.
DONE	Thirteen rates agreed, the campaign opens with a real margin instead of acquiring one later.
THEN	The superadmin creates the enrolment links and talent sends them. Each creator signs their own agreement and enters their own bank details. Nobody types a fee.

What good looks *like*

Everything on the right has actually happened here and cost us something.

✓ What good looks like

- Price what clients have already agreed to, before anything else in your day.
- Clear rosters fast. Talent genuinely cannot move until you do.
- Strike a creator with a reason written down. The reason stops the repeat next month.
- Check the talent board when you are allocating, not only when something has gone wrong.
- Use the quoted cost as a starting point, never as the answer.

× What has actually gone wrong

- Leaving a confirmed proposal unpriced. The client has said yes and is waiting on us.
- Opening a campaign and agreeing rates afterwards. You are then negotiating with somebody who has already started working.
- Approving a creator with no sell price. They cannot be sold, so they are not real.
- Letting a payment go out that the client has not funded.
- Reading the talent board as a scoreboard. It shows load, not quality.

Words we *use*

They mean something specific. A roster is not a list, and cost is not sell.

Brand
A company we are talking to. Becomes a client when a deal is won.

Client
A brand that has bought something. They have an account and can log in.

Deal
One conversation about money. A brand can have many, over years.

Campaign
A deal that was won and opened. Real creators, real money.

Roster
The creators sourced for one brand, for its whole life. It replaced the sheet.

Skip
Not for this campaign. Still in the database; the reason follows them.

Open call
A campaign card creators answer on WhatsApp. The agent collects their price.

ScoutOutreach
Finds creators for a brief, screens them, and DMs or emails them.

ScoutAI
Talks to creators on Instagram or WhatsApp and puts their rate on the roster.

Following Track
Short links per creator. Clicks, carts and sales, shown to the brand once released.

List
A standing question: "fashion, UAE". Answers itself. Never client-specific.

Cost
What we pay a creator. Founders and talent only. Never shown to a brand.

Sell
What we charge a client. A creator with no sell price cannot be sold.

Quoted cost
What we assumed when pricing. Rarely what we end up paying.

Agreed rate
What a creator actually accepted. The only number that is real.

Request
Something somebody is waiting on, with an owner and a date.

Proposal
A priced roster the Founder & CEO sends a client to choose from.

Share link
A /p/ link a client opens without logging in. Only the Founder & CEO sends one.

Enrolment link
A founder creates it, talent sends it, the creator signs and gives their own bank.

The ladder
The rungs a booked creator climbs: briefed, content in, posted, paid.

Held
Stopped until a founder answers. Nothing has happened yet.

Rules that cost *money*

Each one has already cost us something.

- A creator the client should not see is your catch, not theirs.
- Always strike with a reason. No reason means it happens again next month.
- No payment goes out on work you have not confirmed landed.
- Working capital is an amount you approve in writing, never a general permission.

Every screen in the platform is explained under **Guide** in the menu. If something here does not match what you see, the product is right and this is out of date. Say so and it gets reprinted.

Co-Founder

QUICK CARD

OPEN FIRST

- Rates. Clients who said yes and cannot start.
- Then Decisions.

THE ONE RULE

- Nothing opens until every creator has a real rate.

QUOTED IS NOT AGREED

- The quote is what we assumed. The rate is what you got.

NEVER

- Never pay out beyond what the client has funded.
- Never release a creator with no sell price.

WHEN THE FOUNDER IS AWAY

- You are the second pair of hands. Everything of his comes to you.
